

# Alé

## ALÌ E ALÈ The bright classics

From a single project, paying a strong attention to ergonomics and characterized by a generous design inspired by modern sofas with a wide seat, two new sofas have been conceived: Alì and Alé. They both hide a technological heart: a bed ready to be opened which is made of an electro-welded steel frame, the mattress is filled with high density polyurethane, latex or springs. Alì's backrest is shaped through soft independent cushions that enable the seat to be personalized. Alé is provided with two single wide polyester cushions which soften the line of the backrest and don't need to be removed to pull out the bed. Their headrest is characterized by a roll cushion applied over the backrest. The frame is upholstered with polyurethane foam and polyester padding and the cover is fully removable. Available in a wide range of fabric covers Alì and Alé can turn from classic into young and bright sofas.
